Mobile compactors

Skip lift container

Versatile and effective

PRESTO mobile compactors can be used wherever large quantities of recycling material, residual waste or commercial waste similar to domestic waste are generated.

A compactor that is firmly connected with the container compacts the material. The feeding opening is especially low to facilitate feeding the PRESTO mobile compactors.

Easy and safe

Reliable function and user-friendliness go without saying for all PRESTO products. Not only in operation, but also in terms of integration into the working environment.

The use of a PRESTO mobile container does not require any special construction work. An electrical power supply is all that is necessary for putting it into service.

Carefree disposal

The reuse of recycling material or disposal of waste is an important task in the business activities of many companies.

Our long-standing experience in environmental technology and our most modern development and production methods allow us to manufacture products which our customers use as a functional and cost-efficient link in the chain of recycling material compaction and disposal.

Tailored for customer needs

Wherever all kinds of materials are generated and need to be disposed PRESTO mobile compactors can be used.

A large choice of accessories allows us to meet all customer-specific requirements.

We develop your individual optimum solution for your disposal problem.

Features and benefits

-  The particularly low feeding opening and the foldable hook offer maximum feeding comfort.
-  The conical shape ensures easy emptying.
-  The rib-free structure offers you large advertising space.
-  The optimum location of the polyamide guide elements makes for low-maintenance operation.
-  The central locking system is operated from one side, so the emptying hatch can be opened safely and quickly.
-  The large cleaning door allows comfortable access for service and cleaning.

Guaranteed powerful performance

The bent corner profiles ensure particular stability and the elegant rounded corner design. The robust, continuously welded steel construction prevents rust creep.

High-quality components ensure reliable function, low maintenance and quiet operation < 70 dB (A).

Handling is easy, a foundation is not required, and the unit can be put into service immediately.

Of course our paints are lead and chromium free, and you can select the colour of your choice.

for your **pressing** issues
